# Trangie Agricultural Research Centre

Since 1890, NSW DPI has worked to work with the community to drive stronger primary industries.

We continue to build on that legacy to maximise outcomes for NSW primary industries, the communities they support and the resources they rely on, both today and for the future.

Our research stations play an important role in the economic and social fabric of our towns, providing jobs and research that directly helps local primary industries businesses.

feedback on  
our event

Trangie Agricultural Research Centre has had a long and distinguished history in agricultural research since its establishment in 1914 as the Trangie Experimental Farm.

The Centre is NSW DPI's largest research farm, covering 3900 hectares.

The Centre undertakes a wide variety of livestock, cropping, and environmental research.
